

Minimum Size Subarray Sum

Given an array of positive integers `nums` and a positive integer `target`, return the **minimal length** of a subarray whose sum is greater than or equal to `target`. If there is no such subarray, return `0` instead.

Example

```
Input: target = 7, nums = [2,3,1,2,4,3]
Output: 2
```

Explanation

```
The subarray [4,3] has the minimal length under the problem constraint.
```
