

Longest Consecutive Sequence

Given an unsorted array of integers `nums`, return the length of the longest consecutive elements sequence.

You must write an algorithm that runs in $O(n)$ time.

Example:

```
Input: nums = [100,4,200,1,3,2]
Output: 4
```

Explanation:

```
Explanation: The longest consecutive elements sequence is [1, 2, 3, 4].
Therefore its length is 4.
```
